ABOUT ME

I am a determined, knowledge-seeking, and meticulous undergraduate with a strong passion for learning and professional growth. I believe that experiences shape an individual's expertise, and I am eager to gain hands-on experience in a dynamic and collaborative environment.

As a diligent and enthusiastic team player, I am committed to delivering well-structured project documentation, presenting findings effectively, and defending results with a clear understanding of their importance. I am always looking for opportunities to enhance my skills, expand my knowledge, and gain diverse experiences that contribute to both personal and professional development.

EDUCATION

GRADUATE DIPLOMA IN SOFTWARE 2023-Present

ENGINEERING

Leveraging my foundation in software engineering principles (Graduate Diploma), I build robust and scalable applications that meet real-world challenges.

INSTITUTE OF TECHNOLOGY (IIT) (SCHOLARSHIP - FEW MONTHS)

Leveraging my foundation in software engineering principles through the six-month scholarship program at the Informatics Institute of Technology (IIT), I build robust and scalable applications that address real-world challenges. My time at IIT allowed me to enhance my skills in both frontend and empowering me to deliver efficient and user-centric solutions.
